**TO WHOMSOEVER IT MAY CONCERN**

We recently took the assistance of TechGyan to migrate from On Premise MS Exchange Mail Server to Cloud based Office 365 Productivity Solution.

Some of the business challenges which made us consider Office 365 were Mailbox storage, complicated Disaster Recovery for in-house e-mail solution, Manageability, reliability, Business Continuity, Availability, Online Archiving and other Microsoft Office 365 Apps.

Besides the above stated business challenges, the major business impact of moving to Office 365 is cost saving. We saved at least 30% of cost on e-mail solution and 30% to 40% cost saving on MS office licensing. (we were using Volume Licenses before moving to Office 365).

We are planning to use Video Portal and Skype Webinar to expand business value in future.

We are completely satisfied with the Office 365 solution. The Manageability is powerful. We are also satisfied with the TechGyan Team which has helped us to migrate to Office 365.

Yours sincerely,

*Ninad*
